

Know Your Data Center's Potential For Growth And Optimum Performance

You're a candidate for a Data Center Audit if you:

- *Have a facility with 2,500 or fewer square feet.*
- *Are experiencing outages or hot spots.*
- *Are out of space or will not have enough space for the next expansion.*
- *Have maxed out your current power or cooling systems.*
- *Are looking for documented information to help justify budget expenditures.*
- *Need to create a benchmark of your data center operations.*
- *Don't know how your data center compares to other data centers.*
- *Need to cut energy costs or improve your data center availability.*

How Our Data Center Audit Works

The Liebert Data Center Audit compares your current data center infrastructure against 50+ industry best practices to help you address your most pressing power and cooling challenges. The audit will identify areas where enhancements can result in energy savings and availability improvements. It will also help you plan your IT initiatives with a better power and cooling strategy. A Liebert consultant with data center infrastructure design and operation experience performs the audit, and will thoroughly review:

- General data center characteristics
- Service practices
- Rack and cabling
- Power
- Cooling
- Monitoring

Findings are then combined with Emerson's data center expertise to produce a customized report that analyzes your data center's current state, including:

- How your data center stacks up to industry benchmarks
- Current risks with cost/benefit tradeoffs
- Opportunities for improvements
- Recommended action plans

THE LIEBERT SERVICES CRITICAL DIFFERENCE FOR DATA CENTER AUDIT

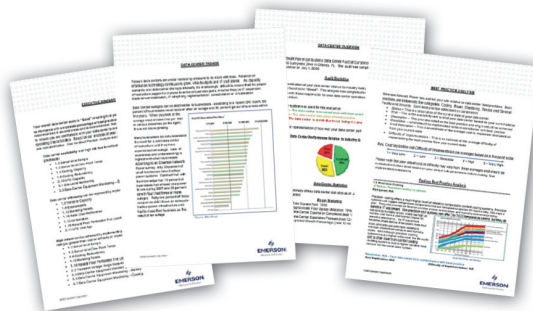

There's Nothing Like It In The Industry — And Only Emerson Offers It

Our Data Center Audit gives you a method to quickly and effectively assess the health of your data center infrastructure at a very affordable price. We will help you uncover risks in your current power and cooling strategy that could result in costly downtime. We can also help you identify areas where you can reduce energy consumption.

No one offers a low-cost site analysis that is comparable to the Liebert Data Center Audit. Some companies will offer to visit your site to discuss products and services... but they do not thoroughly address best practices or rank your risks in a formal report as we do.

- **Expertise** — Get the full measure of our more than 40 years of experience in precision cooling and power infrastructure for data centers across the country.
- **Comprehensive Report** — Our Data Center Audit Report includes a detailed survey of your data center infrastructure characteristics, an evaluation of your data center compared to industry benchmarks, opportunities for improvement, and a recommended action plan.
- **Best Practices** — Our reports show how your operations compare to industry best practices and deliver insight on how you can get the most out of your data center.

All Liebert Services Testing and Assessment services ensure your Business-Critical Continuity™
